Project "FIFA Project on Research of Football Academies Worldwide"

[2022 – 2023]

****The Role of Individually Designed Exercise Programs within the Regular Training Process Aimed at the Prevention, Early Detection, and Correction of Spinal and Lower Extremity Deformities in Children of Developmental Age****

Različito dizajnirani programi korekcije deformiteta kičme mogu utjecati na promjene i poboljšanje narušenog posturalnog statusa. Ti programi su do sada bili individualizirani i primjenjivani kao terapijske vježbe, dok nije zabilježen slučaj njihove primjene u sklopu redovnog trenažnog procesa.

S obzirom na teoretski potencijal, ostaje nejasno da li individualno dizajniran program u sklopu redovnog trenažnog procesa može popraviti narušeni posturalni status tj. deformitete kičmenog stuba i donjih ekstremita, te da li se može primjenjivati kao dodatni vid treninga.

Dakle, primarni cilj istraživanja je da se ranom detekcijom posturalnih nepravilnih stanja kičme i donjih ekstremiteta kod djece razvojne dobi, kroz dijagnostičke metode koje budemo koristili, kurativno pristupi otklanjanju i ublažavanju navedenih deformiteta primjenom individualno dizajniranih programa vježbanja u sklopu redovnog trenažnog procesa u sklopu univerzalne škole sporta.
